

Detector Testers Announces A Very Successful INTERSEC 2020 For The Company And Partners

Published on 6 Feb 2020

Following the successful 2020 edition of Intersec, Detector Testers wanted to thank all the visitors who came for the event during the course of the three days and helped make the event such a great experience and a massive success.

Intersec 2020

During the Intersec show, Detector Testers made a record number of new contacts, with significant interest in the Testifire solution and the company's globally renowned Solo range of detectors. In addition to that, it was great experience for company representatives to meet again with many existing customers who have come to past Intersec events and hear how the company's solutions are making a difference in their day-to-day testing and help

promote best practice within the industry.

Detector Testers made a record number of new contacts, with significant interest in the Testifire solution

Apart from a wide array of fire detection and safety solutions and market insights that were showcased at the Detector Testers stand, visitors could also first-hand experience the company's collaboration products and technologies on other fire safety companies' stands including – Apollo, NSC, Haes, Inim and NAFFCO.

Detector Testers' solutions

It was very encouraging to experience and hear the positive stories about how Detector Testers' solutions are used and experienced by others in the industry. Along with company partners, Novus Fire and Security, Detector Testers are currently following up on all enquires that were put forth at the stand about the products and technologies on display during the show.

Interested individuals with any immediate questions that the company's support staff was not able to answer at the event can feel free to contact the customer support line and, of course, it will be ensured that their query is solved. The shows promotions remain open until the end of the month, so interested people can contact about these during the follow up period.
