

Nittan Europe Announce Upcoming CPD Seminar On Reducing Unwanted “False” Fire Alarms With Multi-Sensors

Published on 22 Jan 2020

Reducing unwanted “False” Fire Alarms with Multi-sensors

Want to know more about minimizing false alarms? Nittan Europe are pleased to announce that as an accredited CPD provider, the company can offer a CPD seminar on “Reducing unwanted False Fire Alarms with Multi-sensors”

Users are all familiar with the many problems associated with false alarms: they are estimated to cost UK businesses around a billion pounds per year. Reducing false alarms is therefore a major task the fire industry has been attempting to address over the years and a prime reason for the development of the Multi-Sensor. With this Presentation, Nittan

Europe attempts to explain the relative advantages of various Multi-Sensor types to help a user choose the best solution for minimizing false alarms.
