

VFIS Vice President Bill Jenaway Receives Re-designation As CFO And CTO At IAFC Conference

Published on 10 Sep 2018

At the recent International Association of Fire Chiefs conference in Dallas, Texas, the Center for Public Safety Excellence conducted its annual professional credentialing and designation process.

This program is voluntary and designed to recognize individuals who demonstrate their excellence across seven measured areas including: education, experience, professional development and contributions, association membership, involvement in community and

technical competence while identifying a plan for future professional development.

Professional Credentialing Program

Dr. Bill Jenaway is one of just 117 CTOs in the nation and 1,306 CTOs across the world

Designations included in the professional credentialing program are: Chief Fire Officer (CFO), Chief Training Officer (CTO), Chief EMS Officer (CEMSO), Fire Marshal (FM) and Fire Officer (FO). VFIS is proud to announce that VFIS Executive Vice President of Education, Training and Consulting, Dr. Bill Jenaway, was the recipient of re-designation as a Chief Fire Officer and Chief Training Officer. He is one of just 117 CTOs in the nation and 1,306 CTOs across the world.

To determine credential recipients and evaluate candidates, the designation programs use a comprehensive peer review model. The Commission on Professional Credentialing (CPC) awards selected designations only after an individual has successfully met all of the organization's stringent criteria.

Emergency Medical Services

During the International Association of Fire Chiefs conference, Jenaway was also the recipient of a 40 year membership pin. It was presented by Jim Yates, President of the

Eastern Division of IAFC. We congratulate him on 40 years of dedicated commitment to this incredible organization.

IAFC members are the experts in emergency medical services, terrorism response, firefighting, spilling of hazardous materials, search and rescue missions, public safety policies and natural disaster response.
