

Kidde Fire Trainers Structural FIRETRAINER T-2000 fire simulator

Technical Specification

Make	Kidde Fire Trainers	
Company	Kidde Fire Trainers, Inc.	
Model code	Structural FIRETRAINER T-2000	

Additional info

Multiple fires in each burn room, with the capability of automatically spreading and extending to other areas. Automatic control system allows the instructor to focus on the students rather than the controls.

Kidde's unique agent detection sensors enable the fires to realistically respond to the proper application of water and foam extinguishing agents

The T-2000 fire simulator also includes:

- ┌ Central PC control room with customized burn building floorplan
- ┌ Room-to-room programmable fire extension
- ┌ Expanded fire control parameters
- ┌ Student performance data logging with printable reports
