

Siemens DF1192 infrared flame detector

Technical Specification

Make	Siemens	
Company	Siemens Building Technologies GmbH	
Model code	DF1192	
Type	Flame	

Additional info

Siemens DF1192 is a infrared flame detector achieves excellent detection reliability while maintaining the highest immunity to interference radiation and sunlight. In order to safeguard against a possible decision emergency, the detector contains an additional emergency activation channel. It detects smokeless liquid and gas fires as well as smoke-generating open fires resulting from the combustion of carbonaceous materials such as wood, synthetics, gases, oil products, etc.
